Powerful home control is now within reach

As a leader in energy management and automation in buildings, with **over 50 years of experience in home automation,** Schneider Electric knows how to bring homes to life. The Schneider Electric KNX Home Automation System puts this experience to good use, so you can **choose from a wide range of functionalities for your home.**

This flexible system can be controlled remotely via an app on a smartphone, tablet or laptop or locally via pushbuttons and touchpads. This puts all residents – from youngest to oldest – in total control of your smart home, inside and out.

Comfort and convenience, tailored to you

Your home is more than just a place to live. It contains the things you value most. With the Schneider Electric KNX Home Automation System, you can control and showcase your home elegantly with a single touch. Just choose the comfort setting that matches your mood.

The KNX Home Automation System connects the technology in your house into a complete, brilliant system.

Comfort and convenience

Home scenarios

This is a useful benefit, and you'll wonder how you lived without it. Dim the lights, close shutters, stream music, turn up the heat, lock the doors and arm the security system, check in on cameras or see who's ringing the doorbell.

Temperature control. Lower the temperature to save energy or crank up the air conditioning to keep cool. It's up to you. And, with advanced settings, you gain impressive control over your home and household budget.

Lighting and shutter control. Having a large group over? Quickly open the shutters to let the sunshine in. Ready to relax, and watch a movie with your family? Easily shut the shades and dim the lights.
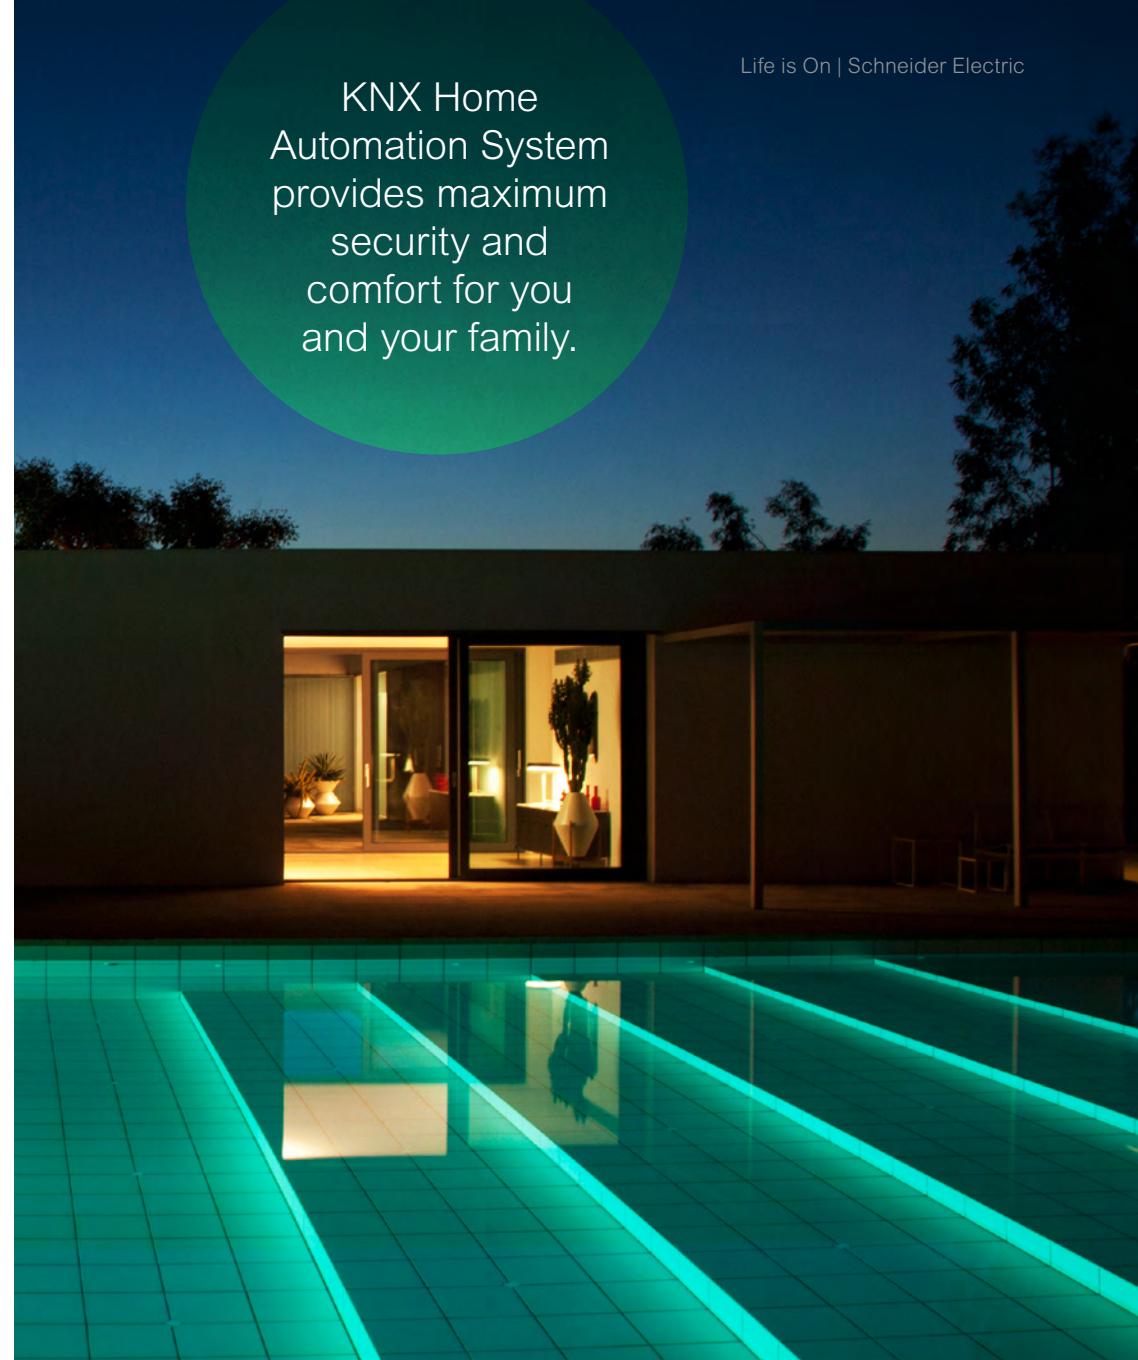

Comfort and convenience

Exterior management

The Schneider Electric KNX Home Automation System is useful not only indoors, but also outdoors. The system takes atmospheric conditions into consideration and can schedule watering accordingly, allowing you to save money on rainy days. And when you're having a barbecue in the garden, KNX will help you create a perfect ambience for your guests. Your swimming pool will always be ready to make a splash thanks to water temperature and quality control.

What's more, the KNX Home Automation System can also control your blinds and awnings to close when upcoming strong wind is detected, or automatically align them with the sun's position.

KNX Home Automation System provides maximum security and comfort for you and your family.

Comfort and convenience

Modern design in many forms

Sleek-looking devices that provide simple and intuitive ways to control your home and look great in any room. They are available in a wide selection of materials, shapes, and colors, and in two design sizes: 55x55 mm (System M) and 71x71 mm (System Design).

Comfort and convenience

Multiroom entertainment

Play movies and music wherever, and whenever you like. You can stream audio/visual content throughout your home Wi-Fi network. The system also works with popular solutions from Sonos and Philips Hue, among others.

Voice control. With the Schneider Electric KNX Home Automation System and Amazon Alexa* or Google Assistant you can tell your house what to do — whether it's turning on the lights after waking up, or setting the perfect mood for dinnertime.

*Amazon Alexa is not available in all countries and languages.

Comfort and convenience

Air quality management

The air quality indoors can be worse than outdoors. Thanks to dedicated CO_2, humidity, and temperature sensors, the air quality in your home is at the perfect level and you are notified if something is wrong.

Comfort and convenience

Elderly assistance

The Schneider Electric KNX Home Automation System makes life easier for those who have difficulty moving around the house. In addition to easy control of shutters, lighting, heating, and air conditioning, you can also automate routine tasks and integrate special help buttons to alert close ones when there is an accident or assistance is needed.

Safety and security at home or away

You have enough to worry about every day. Let the Schneider Electric KNX Home Automation System take care of your home safety, so you don't have to.

Safety and security

Remote access

Open or close the garage, unlock the front door, even turn the lights on or off remotely through your mobile device.

KNX Home Automation System can be accessed, controlled, and monitored through an app from any place.

Energy
management

Flexibility and
scalability

Put energy management at the heart of your home

In a time when energy consumption is at an all-time high, it's more important than ever to do our part. The Schneider Electric KNX Home Automation System provides an easy way to address environmental concerns, and manage sustainable energy solutions.

Comfort and convenience

Safety and security

Energy management

Flexibility and scalability

Energy management

Smart metering

With utility monitoring, you get insightinto water, gas, and electricity consumption. You can review data on a daily, monthly, or yearly basis.

Energy management

Energy savings

Automatically turn off lights when they aren't needed and lower the temperature when you're away. You can even set your lights to dim when there's lots of daylight and rise when it's dark out.

The KNX Home Automation System will help you optimize your electricity usage.

Energy management

Renewable energy

If you've got a photovoltaic installation at home, the Schneider Electric KNX Home Automation System makes it much easier to monitor and control your energy generation and usage.

A system that grows with you

Chances are that 10 years from now your needs will be different than they are today. The Schneider Electric KNX Home Automation System is flexible and easy to upgrade. You can start with a basic home automation solution, and move to a more comprehensive setup over time. Gradually add functionalities or change them without breaking the bank.
